Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 5, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Goncalves.

See Fig. 1 where the container is seen as a bi-fold holder with orifices. The phrase "in a toilet tank" does not further structurally limit these claims and Goncalves is capable of such a use. Claims 4-5 are fully met. Claim 7 finds full response at col. 1, lines 41-42.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goncalves.

The size of the orifices would have constituted an obvious expedient of choice in design depending on what size egress is desired.

Claims 6 and 8-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goncalves taken with Nielsen.

The former is applied as in the rejection of claim 1 supra. The latter shows a tether at 14 of Fig 3 and the toilet tank environment of use in Fig. 2. To employ the

tether of the latter in lieu of the Fig 8 hanger 31 of Goncalves or to provide for the container of Nielsen to be of the nature depicted by Goncalves would have been prima facie obvious to the ordinary artisan as both teach toilet usage environments.

The orifice sizes are treated as in the rejection of claims 2-3 supra.

The tether chain and cable are considered obvious variants and are met by Nielsen.

This application contains claims directed to the following patentably distinct species of the claimed invention: Fig. 1, Fig. 8, Fig. 9 and Fig 10.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Leonard shows another dispenser container.
